Bamboo Arboretum

Forest Area for Conservation

Description:

Arboretum Universitas Padjadjaran in addition to being a park and green area is also used as a place of research and educational tourist attractions in the Unpad Jatinangor. Arboretum is not only overgrown with trees, but also herbaceous plants (soft plants that do not form wood) and shrubs that grow on land and water. The Unpad Arboretum has an area of about 10.5 hectares, divided into several zones :

- Rare Plant Zone
- Rural ecosystem zone
- Medicinal Plant Zone
- Identity plant zone
- Rare plant zone
- Food crop zone
