

Consumption of treated water

Deep Well Location Map

Water springs

Jalatista UNPAD

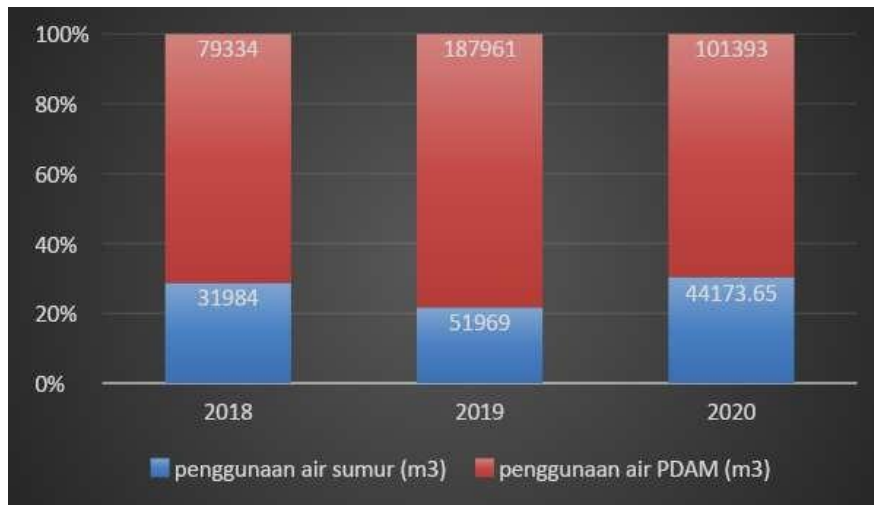

Deep well water installation

Main water reservoir

UNPAD uses three main water sources to meet water consumption needs: PDAM, deep wells, and springs. UNPAD also utilizes water reservoirs to accommodate temporary water, that will flow directly to every building in UNPAD. Some notable buildings use water directly from deep wells and local water reservoirs.

Total of water consumption at Padjajaran University 2018 -2020
