

## Energy and Climate Change (EC)

### Electricity Usage per Year (in Kilowatt hour)

Total Electricity usage (kWh) in 2019-2021 (Padjadjaran University, Indonesia)

Electricity usage during pandemic

#### Description:

The use of electricity since the beginning of the pandemic (March 2020) has continued to decline until now, during the PPKM tightening, electricity consumption reached its lowest point.

Campus Population (normal): 34729

Average consumption kwh/campus population :

$3,767,559.53 \text{ kWh} / 34729 = 108.48 \text{ kwh/indv.}$

Campus Population (During covid) : 1702

$3,767,559.53 \text{ kWh} / 1702 = 2,213.61 \text{ kwh/indv.}$
