

The Prospectus

Universitas Padjadjaran

Innovative. Inclusive. Impactful.

2025

Welcome to Universitas Padjadjaran

Thank you for considering Universitas Padjadjaran (Unpad) —one of Indonesia’s foremost public universities, where excellence meets purpose.

At Unpad, we believe that a university should do more than educate—it should empower. Through inclusive learning, transformative innovation, and profound engagement with society, we prepare our students not just for careers, but for meaningful impact.

Rooted in the cultural richness of West Java, we are proudly Indonesian and globally connected. Our commitment to world-class teaching, research, and sustainability is matched by our dedication to equity, heritage, and the public good.

As we enter our next strategic chapter, we are investing in what truly matters:

- An inclusive and dynamic student experience
- A strong culture of innovation and entrepreneurship
- Smart, green campuses designed for the future
- And partnerships that transcend borders and disciplines

Whether you are a prospective student, academic collaborator, or global partner, we invite you to discover what defines Unpad: Innovative. Inclusive. Impactful.

We look forward to welcoming you into our vibrant and forward-looking community.

Prof. Arief S. Kartasasmita
Rector

Unpad Through Time

Universitas Padjadjaran (Unpad) was founded on September 11, 1957, in response to the growing demand for accessible, high-quality higher education in West Java. What began as a regional initiative has evolved into one of Indonesia's most prominent public universities—known for academic rigor, cultural depth, and social relevance.

Initially headquartered in the city of Bandung, Unpad established its main campus in Jatinangor in 1983. Set against the green hills of Sumedang, this campus has grown into a vibrant academic ecosystem spanning 16 faculties and 2 schools, supported by additional campuses in Bandung, Pangandaran, Jakarta, and Garut. These sites reflect the university's deep commitment to regional engagement while serving as gateways to broader national and international collaboration.

Unpad's institutional autonomy was elevated in 2014 when it was designated a Legal Entity State University (PTNBH) by presidential regulation. This milestone marked a transition in how the university governs itself—enabling greater flexibility, independence, and global competitiveness across academic, financial, and operational domains. Since then, Unpad has steadily advanced its mission through research-driven innovation, inclusive education, and strategic partnerships that transcend borders.

Over the past decade, the university has undergone a profound transformation. It expanded its digital infrastructure to support hybrid and online learning, deepened its commitment to inclusive access—particularly for students from underserved backgrounds—

and elevated its research agenda through interdisciplinary centers of excellence. The university has also launched a bold sustainability vision through its Smart and Green Campus initiative, embedding environmental responsibility into all facets of university life.

Unpad's global engagement has grown in both depth and breadth. The university has forged international academic alliances across Asia, Australia, Europe, and North America, developing joint degree programs, collaborative research, and student mobility schemes. As a result, it is increasingly recognized as one of Indonesia's globally connected universities while remaining grounded in the cultural richness of West Java.

In 2024, Unpad designed its Strategic Plan for 2025–2029, reaffirming its commitment to shaping future global leaders, strengthening social and international impact, and expanding its role as a knowledge epicenter in the fields of health, economy, energy, socio-culture, and agrotechnology. The university's long-term vision toward 2045 aspires to position Unpad not just as a center of learning but as a transformative institution that empowers people, communities, and systems.

Today, Universitas Padjadjaran stands as a forward-looking, inclusive, and globally engaged public university—proudly Indonesian, rooted in Sundanese values, and committed to shaping a better future through education, research, and public service.

Vision

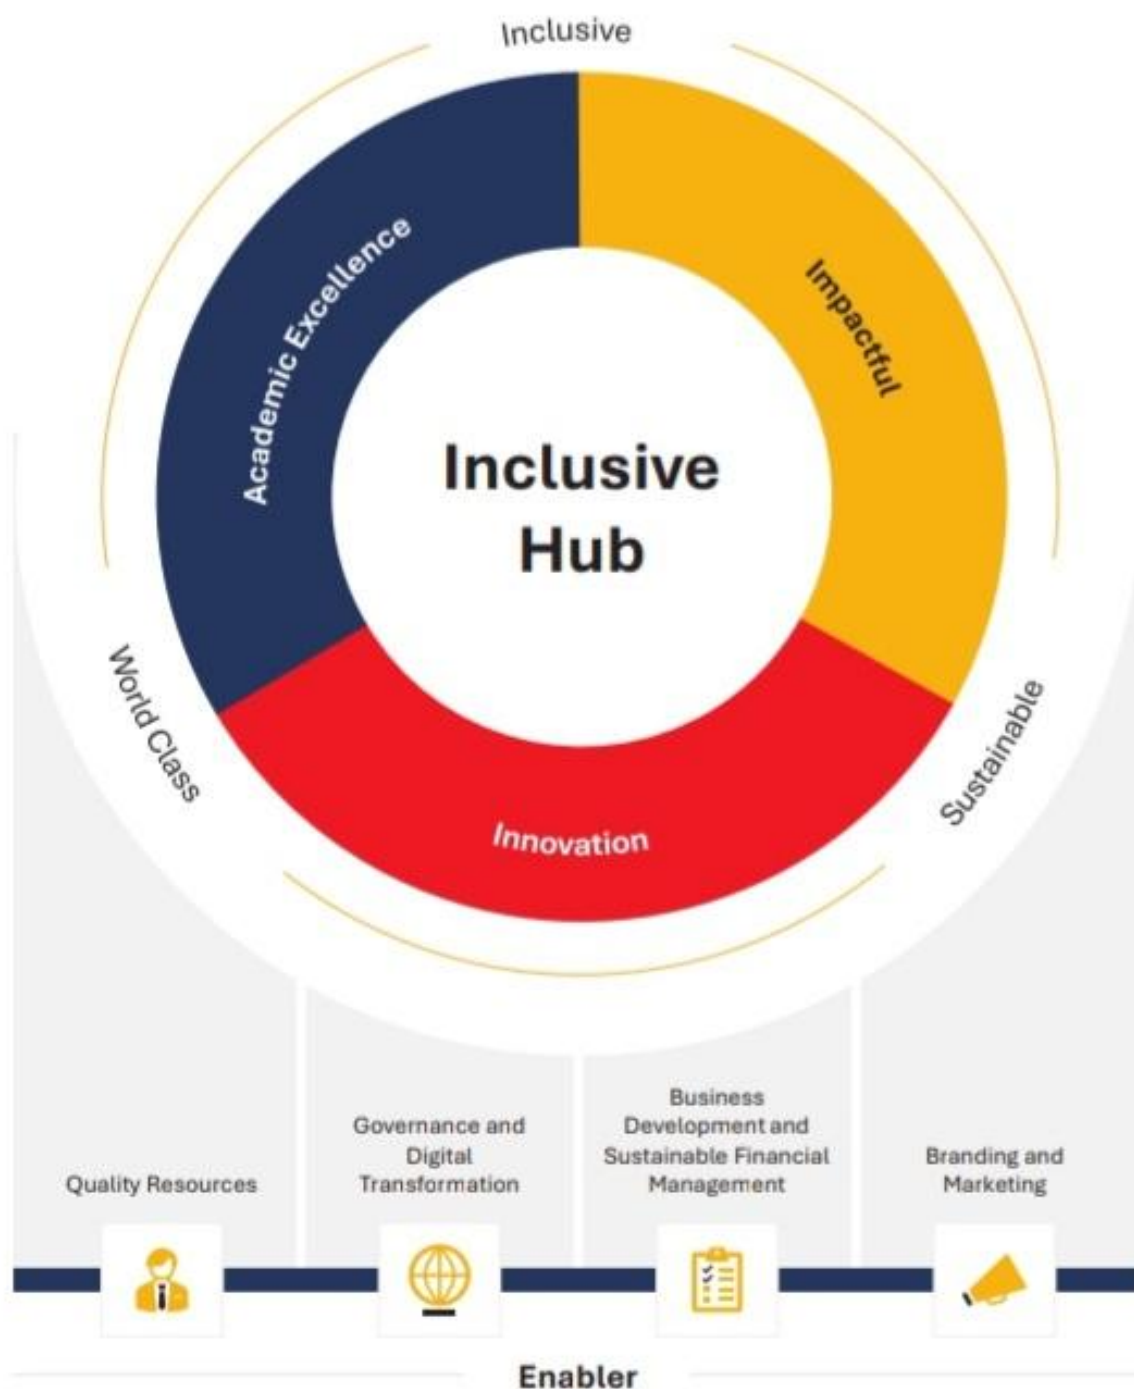

Mission

- 1 Implementing the Tridharma of higher education which is able to meet the demands of the community of users (stakeholders) of higher education services.
- 2 Providing internationally competitive higher education that is relevant to the needs of stakeholders, contributing to intellectual development and community welfare.
- 3 Organizing higher education with professionalism and accountability to enhance the university's reputation.
- 4 Forming academic individuals who uphold the nobility of local and national culture within the diversity of world cultures.

Objectives

Unpad has set strategic goals to be achieved in the realization of its 2025-2029 Vision, focusing on three priority strategic objectives and four driving elements. Each component of these strategic goals is interconnected and mutually reinforcing to achieve Unpad's 2025-2029 Vision, as presented below:

UNPAD Identity

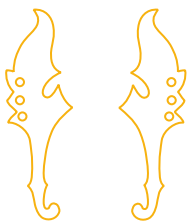

❁ The Symbol of 6 Parts That Have Heraldic Meaning, Namely:

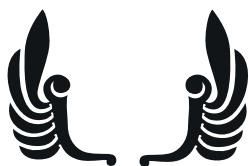

Torch

The torch is knowledge which is the torch of life, which brings the light of happiness towards nobility.

Kujang

The kujang is a Sundanese heirloom weapon as a symbol of strength and courage to protect rights and truth, which is the task of science.

Wings

The wings (depicted with leaves and nails) are a satire on the city of Pakuan which contains the word "paku" which is the center of the greatness of the "Padjadjaran" kingdom and these nail leaves are wings meaning always trying to achieve a higher level or quality.

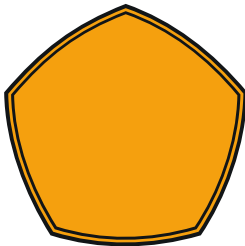

Wheel

The wheel is society, which like a wheel always moves around in the process of change and which is the character of Universitas Padjadjaran.

Lotus Flower

The blooming lotus flower means eternal glory, sacredness for all time, a symbol of culture and education.

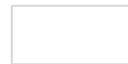

Pentagon, a shield in the shape of a pentagon

The pentagonal shield is Pancasila, the state principle which is the guideline for all efforts and activities of the university for the benefit of the state and nation.

Symbolic Meaning of Colors

Yellow means glory and nobility
(base)

White means honesty and purity
(kujang and lotus)

Red means cleanliness
(wheel and torch flame)

Black means steadfastness, strength,
and fortitude (wings)

Unpad Sites

BANDUNG

The Urban Gateway

Strategically located in the heart of Bandung, this city campus functions as Unpad's urban anchor—hosting graduate-level programs, leadership events, and the university's executive and administrative core. Bandung campus also supports academic symposia, national collaborations, and university ceremonial events, making it central to Unpad's academic diplomacy.

JATINANGOR

The Academic Heart of Unpad

Our largest and most comprehensive campus, located at the foot of Mount Manglayang, Jatinangor is home to 16 faculties and 2 schools. Spread across 1.78 million square meters, this green, self-contained academic city supports the full student experience—from classroom to community engagement. As the university's innovation and research hub, Jatinangor integrates world-class learning with public service, cultural exploration, and student-driven initiatives.

JAKARTA

The Capital Connector

Located in Central Jakarta's Menara Danareksa, our capital-city campus serves as Unpad's strategic outreach hub. Designed for postgraduate and executive programs, the Jakarta office fosters academic partnerships, stakeholder engagement, and lifelong learning opportunities—bringing Unpad closer to national policy, industries, and professional communities.

GARUT

Regional Health & Human Development Hub

Specialized in early childhood education and regional human resource development, Unpad Garut delivers targeted programs tailored to local needs. Its close link with health services and government institutions positions it as a catalyst for inclusive and sustainable growth in the East Priangan region.

PANGANDARAN

Coastal Innovation & Community Learning

Unpad Pangandaran connects higher education with coastal community development. Established in collaboration with local and provincial government, this campus focuses on applied disciplines like marine science, animal husbandry, and business communication. With a commitment to regional empowerment, Pangandaran campus blends modern facilities with an immersive, hands-on learning environment.

Faculty of Law

The Faculty of Law at Unpad is one of the four founding faculties that laid the foundation for the university and has become a core part of its identity in the field of education. This is reflected in the establishment of Unpad's Main Scientific Pattern (Pola Ilmiah Pokok/PIP), which emphasizes "The Noble Development of Law and the Environment in National Development."

The establishment of the Clinical Law Laboratory also serves as a distinctive feature of the Faculty of Law at Unpad. The faculty remains committed to meeting societal needs by upholding the Three Pillars of Higher Education (Tri Dharma Perguruan Tinggi).

Faculty of Economics and Business

The Economics and Business Faculty was established in accordance with Government Regulation no. 37 of September 18, 1957. The Faculty was initially a part of Universitas Merdeka under the Foundation of Universitas Merdeka Bandung, established in 1952, before becoming part of Universitas Padjadjaran five years later under the name Faculty of Economics. In 2011, the name of the faculty was modified in order to make it a management and business school that can compete at an international standard, in line with Unpad's goal to be a world-class university.

The faculty has now become one of the top faculties for economics and business education in Indonesia. The Faculty offers 18 highly accredited programs ranging from Bachelor Programs to Doctoral programs. In total there are 5 Bachelor's Degree programs, 6 Master's Degree programs, and 3 Doctoral programs on offer, differing in fields of study from economics and accounting, to marketing, business, and management. The Faculty also runs an accounting Professional Program, part of the requirements to become a professionally licensed accountant in Indonesia.

Faculty of Medicine

The idea to establish The faculty of medicine in Indonesia came first from the then Minister of Health, dr. Lie Kiat Teng, at the 1953 The Indonesian Medical Association (IDI) Congress in Surabaya. With the founding of Universitas Padjadjaran based on Government Regulation Number 37 of 1957, the Faculty of Medicine was established alongside three others, making up the first iteration of Universitas Padjadjaran. Adhering to the development of knowledge and technology in medicine, a postgraduate education program was established in 1979. Then, in 2006, the Faculty opened a doctoral program for medicine which was done in collaboration with Universiti Kebangsaan Malaysia's Faculty of Medicine, proving its international recognition.

Currently, the Faculty of Medicine is focusing on efforts to develop its programs and facilities within the context of advancing internationalization, strengthening research and innovation, and improving the healthcare of the community, especially in West Java. The main goal for the Faculty is to break through into the top 500 ranking in the Life Sciences and Medicine category of the QS World University Rankings.

Faculty of Mathematics and Natural Science

Inaugurated by the first president of the Republic of Indonesia, Ir. Soekarno, on 1958 accompanied by a speech titled “The Development of the Natural Sciences throughout the Centuries”. The first iteration of the Faculty operated under the name Fakultas Ilmu Pasti dan Ilmu Alam (FIPIA) and included four disciplines, exact sciences (mathematics), physics, chemistry, and biology. In 1982, the name of the Faculty into the Faculty of Mathematics and Natural Science (FMIPA).

Currently, FMIPA offers programs at both undergraduate and graduate levels, with 9 Bachelor’s Degree programs, 5 Master’s Degree programs, and 2 Doctoral programs.

All of the programs offered by the Faculty have been highly accredited by the National Accreditation Body (BAN-PT), with most receiving the unggul accreditation, the highest within BAN-PT’s system. The Faculty endeavors to excel in education and research which are internationally recognized and impactful to society. FMIPA continuously promotes research that focuses on downstreaming, the increase of international scientific publications, and the acquisition of Intellectual Property Rights for scientific products.

Faculty of Agriculture

This faculty is highly committed to contributing to the development of the agricultural sector in Indonesia. Initially, the faculty was located at Dipati Ukur Street No.37 Bandung, with the classes being spread all over campus grounds. Later on, the faculty moved to Unpad's Jatinangor campus in September 1986. The Faculty of Agriculture at Universitas Padjadjaran offers a variety of study programs, including undergraduate and postgraduate programs. The study programs are set to develop the productivity, quality, and efficiency of the nation's agriculture sector, as well as to support its sustainability. To maintain and improve the quality of education and research, the faculty is currently collaborating with numerous universities and institutions, both public and private, on the national and international stage.

The alumni of the Faculty of Agriculture are proven to not only be successful in the field of agriculture as well.

They are also capable of competing in several other fields, as there are plenty of alumni who are entrusted with honorable positions in many public and private institutions.

The Faculty of Agriculture puts particular focus on the sustainable productivity of the agriculture sector, internationally recognized innovations and graduates, as well as partnerships, societal contributions, and excellent management supporting the Faculty's advancement. Everything is done to fulfill Faperta's vision in becoming an internationally renowned and societally impactful school of agriculture.

Faculty of Dentistry

Dentistry applies student-centered learning methods to its teaching, utilizing a competence-based curriculum per the Standar Kompetensi Dokter Gigi Indonesia (Indonesian Dentist Standard of Competence). Said standard consists of 6 domains, namely professionalism, scientific mastery of medicine and dentistry, general physical and stomatognathic examinations, recovery of the stomatognathic system, communal dental and oral health, and management of dental practices.

The Faculty of Dentistry adopts the 7S (or Seven Smart) Program which integrates the Three Pillars of Higher Education with the activities of FKG's academics, staff, alumni, and the supporting facilities and technologies utilized.

The 7S program itself is built on the values of Smart Governance, Smart Campus, Smart Research and Publication, Smart Lecturer and Employee, Smart Student, Smart Business, and Smart Alumni. The Faculty's main goal is to be a leading education institution in dentistry specializing in the field of oral and maxillofacial health, supported by excellent human resources, and internationally competitive by 2025.

Faculty of Social and Political Sciences

Social and Political Sciences was established on October 13, 1958 as the Faculty of Public and Business Administration. The name of the Faculty then changed on August 12, 1960, based on the Decree of the Minister of Education, Pedagogy, and Culture No. 66971/UU/60, to the Faculty of Social and Politics. After December 8, 1983, the Faculty would go through another name change, designating the Faculty its current name.

The various study programs run by The faculty aim to produce outstanding experts proficient in the fields of social and political sciences. To achieve that, the courses teaching fundamental concepts of the social and political sciences are delivered to all students of the faculty.

Meanwhile, there are also courses to hone the students' professional skills, taught especially to students of each program. The courses also provide theoretical understanding as well as instruct the students on the methodologies of research in social and political science. The students are also equipped with the skills to comprehend the phenomena happening in society through fieldwork courses. Currently, The faculty offers 9 Bachelor's Degree programs, 8 Master's Degree programs, and 4 Doctoral Degree programs.

Faculty of Cultural Sciences

Originally named the Faculty of Letters (Fakultas Sastra), was founded on November 1, 1958 with the Decree of Yayasan Pembina Universitas Padjadjaran No. 6/FS/531 of October 1, 1958 regarding The Establishment of the Faculty of Letters. Two years later, the Faculty gained a stronger legal status with the decree of Minister of Education, Pedagogy, and Culture No. 66971/UU/60 of August 12th 1960, making the Faculty of Letters the 8th faculty to be established in Unpad. The Faculty of Letters changed its name to the Faculty of Cultural Sciences in 2012, adapting to the growing complexity and intersectionality of the faculty instruction. This illustrated the qualities of the students and graduates in being able to actively communicate in languages they studied as well as comprehending linguistics, literature, history, and culture.

The change allows this faculty to develop a more interdisciplinary, multidisciplinary, and transdisciplinary education and study of culture, utilizing a theoretical framework that is more critical, inclusive, and sensitive towards change.

The faculty vision is to become a distinguished institution in conducting world-class higher education by 2026. The faculty commits to producing excellent human resources in the fields of language, literature, culture, and history who are adaptive towards change and intelligent in building an entrepreneurial spirit.

Faculty of Psychology

Universitas Padjadjaran's Faculty of Psychology (Fakultas Psikologi, or Fapsi) was officially founded on September 2, 1961 at the Unpad Hall in Bandung, with Kol. dr. Soemantri Hardjoprakoso acting as the first Head of the Faculty. In 1996, Fapsi moved its faculty from Unpad's Bandung Campus at DipatiUkur to Unpad's Jatinangor Campus.

The Faculty of Psychology is a leading contributor to the science of psychology in Indonesia and a pioneer of psychological research through the development of its laboratories. Apart from conducting educational practices, Unpad Fapsi also focuses on developing and applying practical psychological knowledge and methods in order to contribute to society.

Fapsi aims to continue developing and applying the science of psychology for the welfare of mankind. The Faculty's target is to become an internationally renowned higher education institution in the field of Psychology. Faculty of **Animal Husbandry**

Universitas Padjadjaran's Faculty of Animal Husbandry (Fakultas Peternakan, or Fapet) was pioneered by Prof. Dr. Didi Atmadilaga. On July 27, 1963, the faculty was established with the Decree of the Minister of Higher Education and the Sciences no. 86/63. The faculty was then officially founded on September 1, 1963. Fapet first conducted its teaching and administrative processes at a number of locations in Bandung, including the Unpad Fapet Campus at Dago which was in use since 1969. In 1986, the Faculty of Animal Husbandry became one of the first Unpad faculties to entirely relocate to its current campus in Jatinangor, Sumedang.

The students and faculty members have gained numerous achievements at national and international levels. Fapet's alumni are spread in many institutions and businesses, both in public and private sectors, pursuing various fields including (but not limited to) entrepreneurship, agribusiness, banking, education, as well as research and career development.

The Faculty's works of research have been published in many national and international journals, presented in national and international seminars, and adopted by various industries. Some of the products have obtained Intellectual Property Rights from the Ministry of Justice and Human Rights of the Republic of Indonesia.

The faculty continuously aims to improve the quality of the animal husbandry sector, and human resources, in West Java. In terms of community services, the Faculty has been organizing mentoring sessions, counseling, as well as corporate social responsibility (CSR) programs for the local community, farmers, and stakeholders. Fapet strives to become a faculty committed to excellence and environmental friendliness in the science and technologies of animal husbandry.

Faculty of Communication Sciences

Universitas Padjadjaran's Faculty of Communication Sciences (Fakultas Ilmu Komunikasi, or Fikom) was founded on September 18, 1960, under the name of Fakultas Djurnalistik dan Publisistik. It was in 1982 that the Faculty started to use the name it would operate under to this day. Unpad Fikom was located in Universitas Padjadjaran's Bandung Campus, before relocating to its current location as part of Unpad's Jatinangor Campus.

The Faculty of Communication Sciences continuously upgrades the curriculum based on the students' needs, and as a consequence of the rapid development of science, technology, social systems, politics and economy. Thus, it consistently seeks for opportunities to build partnerships with potential institutions with resources and access to

In addition, the Faculty of Communication Sciences has received numerous awards, namely "The Best School of Communication" from MIX Marketing Magazine (SWA Media Group) for four consecutive years. The award verifies Fikom's wide recognition.

Unpad Fikom always strives to achieve its goal in becoming a nationally and internationally reputable, socially impactful, and research-based higher education institution in the communication sciences.

Faculty of Geological Engineering

The Department officially began its operations on November 17, 1959 under the leadership of its two main founders, Major General Prof. Dr. Moestopo and Drs. M. Koesmono. On December 12, 2007, the Department, which had developed into the Department of Geological Engineering, separated from the Faculty of Mathematics and Natural Sciences to stand alone as the Faculty of Geological Engineering.

The Faculty strives to produce reliable and professional geologists who excel and are capable to compete at national and international levels, specializing in the fields of energy and mineral exploration, geological engineering, and many more. The Faculty seeks to push exemplary research to be published nationally and internationally

by prioritizing studies conducted by both professors and students. The results of which are expected to be useful to society. The Faculty of Geological Engineering has become the main information center for geology, especially around West Java and Banten. Thus, the Faculty runs its programs by focusing on a few aspects of its graduates. These range from expertise, published works, balance between learning and research, as well as community service.

Unpad's Faculty of Geological Engineering upholds its vision to become an international quality institution of Geological Engineering education. Faculty of Geological Engineering Unpad also aims to benefit society greatly, for West Java, Indonesia, and the world.

Teaching and Research

Digital transformation in higher education has become an urgent need in the era of the Industrial Revolution 4.0. The learning process must go beyond the limits of space and time, and adopt technology to create a flexible, interactive, and relevant learning experience in line with current developments.

As part of this transformation effort, the Digitization of Learning Materials and Development of an Integrated Learning Management System (LMS) program is designed to create a comprehensive digital ecosystem. This program includes the development of electronic learning materials, digital libraries, and interactive learning modules to support technology-based education that can be accessed by students and lecturers from various locations and platforms.

In addition, this program aims to develop and integrate a learning management system (LMS) that supports various learning models, including online, hybrid, and blended learning. Through this approach, it is expected to create a flexible and interactive learning experience that aligns with modern curriculum needs. This program will strengthen the digital learning platform connected to curriculum demands and the expansion of global access to education.

As part of this ecosystem, Luhung, Universitas Padjadjaran's non-degree digital learning platform, plays a strategic role in expanding inclusive and lifelong learning. Luhung offers short courses, certifications, and micro-credentials that support reskilling and upskilling for professionals, the public, and students. This non-degree initiative complements formal education by providing accessible, modular, and stackable learning pathways that respond quickly to evolving societal and industry needs.

Strengthening International - Standard Research Quality and Capacity at **Unpad**

Universitas Padjadjaran is committed to elevating the quality and capacity of its research activities to meet international standards. One of the key priorities is optimizing the rich pool of expertise within its academic community, including active faculty members, retirees, staff, and alumni. A centralized platform will be developed to map and connect these diverse areas of expertise, facilitating cross-disciplinary collaboration and serving as a bridge between academia and industry. This initiative will not only strengthen internal synergy but also showcase Unpad's academic excellence to global stakeholders. To support this ecosystem, Unpad will invest in state-of-the-art research infrastructure

by acquiring cutting-edge equipment and developing comprehensive research databases.

These investments will be pursued through creative funding models such as PTN-BH allocations, competitive national and international grants, and partnerships with industry. Furthermore, Unpad aims to boost the commercialization of research outcomes and intellectual property by fostering strategic industrial collaborations, nurturing startups through incubation programs, and reinforcing innovation ecosystems. With these efforts, Unpad envisions a research landscape that contributes meaningfully to economic growth and sustainable development.

Center of Excellence

SDGs Center of Universitas Padjadjaran

The SDGs center at Universitas Padjadjaran is a pioneering multidisciplinary research institution, established on May 20, 2016, and recognized as the first independent center in Indonesia dedicated exclusively to supporting the achievement of the Sustainable Development Goals (SDGs).

The Center aspires to play a strategic role in driving Indonesia's progress toward the 2030 SDGs targets. As a hub for multidisciplinary research, the SDGs Center fosters academic inquiry on sustainable development across global, national, and local contexts.

It serves as a platform for the dissemination of SDG-related research findings—both from within the university and its external collaborators. Furthermore, the Center is committed to strengthening analytical capacities of academics and policymakers at both national and regional levels through tailored capacity-building programs, enabling more effective formulation and evaluation of SDG-aligned policies.

It serves as a platform for the dissemination of SDG-related research findings—both from within the university and its external collaborators. Furthermore, the Center is committed to strengthening analytical capacities of academics and policymakers at both national and regional levels through tailored capacity-building programs, enabling more effective formulation and evaluation of SDG-aligned policies.

Our Vision: Indonesia achieving SDGs in 2030

Our Mission:

- Providing evidence-based policy recommendations to achieve SDGs
- Independently monitoring progress of SDGs
- Mainstreaming SDGs into research and policies
- Facilitating dialogues to achieve SDGs

Our Main Activities:

- Independent studies
- Publications
- Conferences, workshops, seminars
- Trainings
- Research collaboration, networking and facilitation

Center of Excellence for Pharmaceutical Care Innovation (PHARCI)

The Center of Excellence for Pharmaceutical Care Innovation (PHARCI) was established in 2016 as the Research Center of Pharmaceutical Care Development. PHARCI commits to conduct research, collaborations, capacity developments, and community services to support the implementation of rational drug use and improve the quality of pharmaceutical services.

Our ultimate goal is to improve the quality of life of the community. We believe that by bringing together various scientific disciplines within our team, we can reinforce our efforts to achieve the goals. Our multidisciplinary team comprises experts in the field of clinical pharmacy, pharmacoconomics, pharmacoepidemiology, drug utilization study, pharmacogenetics, pharmacology, molecular pharmacology, and nutraceuticals. PHARCI has collaborated with various government institutions, industry, health care facilities, NGOs, educational institutions and research centers. These collaborations have created several products, innovations, scientific articles, and policy recommendations.

PHARCI has established several facilities that can support the research and collaboration, such as Medication and Therapy Adherence Clinics (MTAC), Animal Research and Innovation Center (ARIC), Center of Development for Biologic Therapy, Cell Biology and Molecular Laboratory, and Growth Hub (Business Incubator). PHARCI also manages two national journals, namely the Indonesian Journal of Clinical Pharmacy (IJCP) and Pharmacology and Clinical Pharmacy Research (PCPR), which have been accredited with Sinta 2.

Center of Excellence

Center for Digitalization and Development of Sundanese Culture

Lopian Unpad stands for the Center for Digitalization and Development of Sundanese Culture at Universitas Padjadjaran (Unpad). This institution is dedicated to the preservation, documentation, and development of Sundanese culture through digital technologies and scientific research.

Purpose and Functions

Lopian Unpad aims to safeguard and promote the rich heritage of Sundanese culture, including ancient manuscripts, audio recordings, books, and other historical documents. Many of these archives are vulnerable to damage or loss. Through digitalization and restoration, Lopian strives to ensure the sustainability of Sundanese cultural heritage, making it accessible for future generations.

Activities and Programs

Lopian Unpad conducts a variety of initiatives, including:

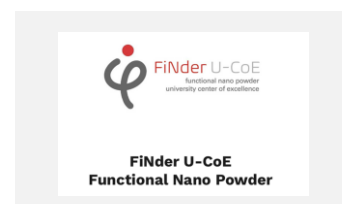

- **Digitalization and Restoration**
Converting ancient manuscripts and cultural archives into digital formats for long-term preservation.
- **Scientific Publications**
Publishing Lopian: Journal of Local Knowledge, featuring research and scholarly studies on Sundanese culture
- **Cultural Podcast**
Through the Lopian Unpad Podcast, the center explores prominent figures, historical publications, and Sundanese literary works, such as those of Haji Hasan Mustapa and Ajip Rosidi.
- **Courses and Training**
offering Sundanese culture courses aimed at enhancing public understanding and appreciation of local cultural heritage.

FiNder Unpad (Functional Nano Powder – University Center of Excellence)

Finder Unpad is a leading research center at Universitas Padjadjaran that focuses on the development and application of nanotechnology. Established as a University Center of Excellence (PUI-PT), FiNder integrates multiple disciplines—including physics, chemistry, biology, engineering, and computer science—to foster innovation in nanoscience and provide practical solutions to societal and industrial challenges.

Serving as a bridge between academic research and industrial needs, FiNder Unpad offers a wide range of services, including nanoparticle synthesis, solid and liquid waste treatment, and nanomaterial characterization. Currently, the center provides over 45 specialized services accessible to both academic institutions and private-sector stakeholders. FiNder also actively publishes scholarly research and hosts international conferences such as ICePTI, ICTAP, and the National Physics Symposium (SFN), serving as platforms for scientific collaboration and knowledge exchange.

FiNder engages in strategic partnerships with various industries, including PT Rekayasa Industri, to support the downstream application of research and the advancement of nano-based technologies in Indonesia. These collaborations reflect FiNder's mission to strengthen the national innovation ecosystem through interdisciplinary and interinstitutional approaches, contributing to science and technology-based sustainable development.

Equipped with advanced laboratory facilities and supported by a team of expert researchers, FiNder Unpad is committed to becoming a center of excellence in nanotechnology innovation. Through research, training, and technology services, the center not only advances academic development but also contributes meaningfully to social and economic transformation at the national and international levels.

Center of Excellence

The Center for Environment and Sustainability Science (CESS)

The Center for Environment and Sustainability Science (CESS) at Universitas Padjadjaran (Unpad) is an excellence center established with the aim of advancing knowledge in the fields of environment and sustainability through interdisciplinary and transdisciplinary approaches. CESS plays an important role as a research and development center that not only focuses on environmental studies but also on the social and economic aspects related to sustainability. As the first institution in Indonesia to develop sustainability studies across disciplines, CESS plays a strategic role in addressing global challenges related to climate change, environmental degradation, and food security.

Since its establishment, CESS has actively carried out research programs aimed at solving environmental problems holistically and based on evidence. One of its main goals is to support the achievement of sustainable development that balances ecological, social, and economic interests. CESS is committed to producing research that is not only academically beneficial but also implementable in policies and real actions on the ground.

Various activities carried out by CESS include training and workshops in environmental impact analysis (AMDAL), research on ecosystems, and educational programs to raise awareness about the importance of environmental preservation.

One important activity conducted by CESS is water sample collection training, carried out by the Ecology Laboratory of Unpad. Additionally, CESS is also actively participating in international conferences, such as the Global Issues Convention 2024 in Germany, to share knowledge and interdisciplinary research to address global environmental issues.

Moreover, CESS also establishes strong international collaborations with various global institutions and organizations. For example, they visited the FAO headquarters in Rome to discuss urban agriculture initiatives based on climate-resilient cultural heritage. This collaboration demonstrates CESS's commitment to contributing in developing innovative and adaptive solutions to the environmental challenges faced by global society today.

With an approach based on scientific research and collaboration across disciplines, CESS strives to make a significant contribution to creating a more sustainable society. CESS also encourages the transformation of public policies and development practices that are more environmentally friendly. In this increasingly complex era, CESS is committed to continuing to innovate and have a positive impact in creating a better future for future generations.

Campus Life

◆ Make the most of your potential at Universitas Padjadjaran.

Campus life at Universitas Padjadjaran was developed with the idea of creating an atmosphere that supports the development of the potential of the entire academic activities—students, lecturers, and educational staff—and Unpad residents both academically and non-academically. To realize this vision, Universitas Padjadjaran has made efforts to maximize the use of various assets across its campuses, including the main campus at Dipati Ukur, Jatinangor, and Pangandaran campus.

To produce outstanding graduates, Universitas Padjadjaran also strives to facilitate students in off-campus learning and extracurricular activities. Through participation in various non-academic activities outside the classroom,

students can improve their personal development and also acquire essential soft skills such as emotional intelligence, teamwork, self-management, leadership, creativity, critical thinking, and the ability to solve complex problems.

Universitas Padjadjaran offers a variety of Student Activity Units related to creativity, interests, and talents, including music, sports, arts and culture, community development movements, and more. Students from all academic levels can choose the activity units that interest them and engage in inclusive campus activities. The development of these Student Activity Units is not only aimed at developing creativity, interests, and talents but also at helping students achieve accomplishments both nationally and internationally.

Some of the facilities at Universitas Padjadjaran used for these activities include:

1. GOR Jati, Universitas Padjadjaran football field;
2. Basketball, volleyball, futsal, and badminton courts at GOR Bale Santika complex;
3. The Secretariat complex for Student Activity Units (UKM) at the university and faculty levels;
4. The fitness center at GOR Jati, Jatinangor

Other than sports facilities and meeting rooms, Universitas Padjadjaran also provides the following facilities for learning outside the classroom:

1. Universitas Padjadjaran Central Library (KANDAGA), operating from 8 a.m. to 10 p.m.
2. Learning Management System (LMS) LiVE Unpad.

For students who want to live close to the campus, Unpad provides on-campus accommodation. Currently, Unpad accommodates 17 comfortable dormitories, including those in Garut and Pangandaran. Apart from these dormitories, the Unpad campus is also surrounded by lots of affordable rooms or houses for rent and even luxurious apartments. Furthermore, Unpad is equipped with cozy cafeterias or canteens that can serve not only as dining areas but also as study spaces or simply as a place to relax and have little chat with friends.

To help students explore the expansive Jatinangor campus, Unpad provides free on-campus transportation. This service runs continuously from 7 a.m. to 4 p.m., taking passengers from the main gate to all campus facilities. Stops are available at each faculty, where individuals can easily board and disembark.

Student Organizations

In 2025, Universitas Padjadjaran has 37 student organizations at university level, consisting of 35 Student Activity Units (UKM), the Student Representative Council (BPM), and the Student Executive Board (BEM).

In the past five years (2020-2024), Universitas Padjadjaran has won 4,337 national and international championships in the fields of arts, sports, culture, and competency development (talents and creativity).

Student Activity Units are grouped into several areas of activity, including:

1

Culture and Arts

- Unpad Student Choir
- Sadaluhung Padjadjaran Drum Corps (SPDC)
- Lingkungan Senin Sunda (LISES)
- Gelanggang Seni Sastra, Teater, dan Film (GSSTF)
- Padjadjaran Ensemble Community (ORKESTRA)

2

Sports

- Perisai Diri (PD)
- Merah Putih (MP)
- Unpad Shorinji Kempo
- Unpad Karate (UKU)
- Unpad Taekwondo (UTKD)
- Unpad Student Chess (UCMU)
- Unpad Bridge (UBU)
- Unpad Swimming (URU)
- Unpad Hockey (UHU)
- Unpad Baseball & Softball (UBSU)
- Unpad Soccer (USBU)
- Unpad Basketball (UBBU)
- Unpad Volleyball (UBVU)
- Unpad Badminton (UBTU)
- Archery (Padry)
- Tarung Derajat

3

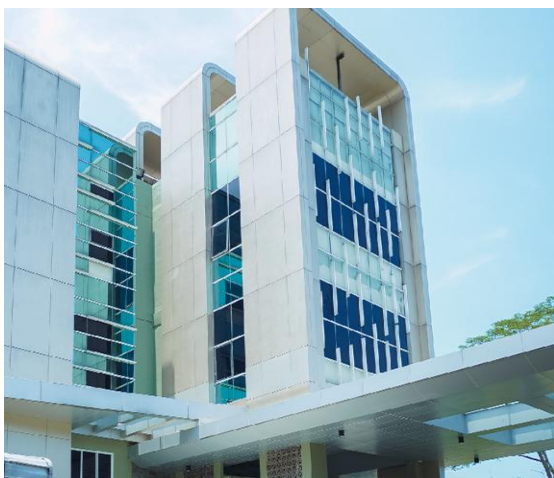

Competency Development (Interests and Creativity)

- Palawa
- Unpad Search and Rescue (SAR)
- Indonesian Red Cross Volunteer Corps (KSR PMI)
- Unpad Student Regiment (Menwa) Battalion II
- Unpad Scout
- Student Protocol Corps (KPM)
- Photography (Spektrum)
- Association Internationale des Etudiants en Sciences Economiques et Commerciales (AIESEC) in Unpad
- English Speaking Union (ESU)
- Institute for Democratic Community Studies and Service (LPPMD)
- Unpad Internasional Association of Student in Agriculture and Related Science (IAAS LC)
- Family of Muslim Students on Campus (KMMK)
- Student News (Warta Kema)

- 21 Park
- 22 Cikahuripan (Nature Reserve/Forest Area)
- 23 Integrated Science and Technology Building
- 24 Community Hall
- 25 Veterinary Hospital
- 26 Creative Space
- 27 MOOC (Massive Open Online Courses)
- 28 Unpad Counseling Center
- 29 Ecoriparian
- 30 Knowledge Theater
- 31 Student Center
- 32 5-Minute Access to Jatinangor Toll Gate
- 33 BEAM (Bike/E-scooter Sharing Service)
- 34 Unpad General Hospital

Sustainable and Inclusive Campus

Universitas Padjadjaran is committed to becoming a leading institution in advancing the Sustainable Development Goals (SDGs) through the development of a sustainable and inclusive campus. This vision is reflected in various environmental initiatives, such as the adoption of renewable energy through solar panel installations, integrated waste management programs, water conservation systems, and the promotion of green transportation including electric shuttles and bike lanes. These efforts aim to reduce the university's environmental footprint while fostering environmental awareness among its academic community.

Social equity and well-being are also central to Unpad's approach. The university provides scholarships and financial aid for underprivileged students, ensures campus facilities are accessible for persons with disabilities, and offers mental health services through on-campus psychological counseling. These initiatives are designed to create a safe, supportive, and equitable

learning environment for all students and staff, regardless of their background.

From an economic perspective, Unpad integrates sustainability into its operations by promoting energy and resource efficiency, digitizing administrative services, and supporting sustainable entrepreneurship through its innovation and incubation programs. Partnerships with industry and government stakeholders further enable Unpad to align its academic and research agenda with sustainable economic development.

Inclusivity remains a core value in Unpad's identity. The university actively promotes diversity, gender equality, and accessibility through inclusive learning platforms, anti-discrimination training, and spaces for open dialogue across identities. By embedding sustainability and inclusivity into every layer of its campus life, Unpad aspires to be a model of responsible higher education for Indonesia and beyond.
